

## Abroach Cold Rolled Section Steel Production Line

This is a specialized for cold rolled section steel with widespread uses. Taking steel strip as raw material, producing cold rolled section steel by cold rolled section forming technology according to relevant request.

This kind of technology is advanced and reliable , PROFIBUS is adopted in the control system. All of these ensured highly synchronization accuracy and the best product quality. All the indicators and operational costs are controlled on the best level, so honored in the industry.

### Technical Specifications

| No. | Model  | Size            | Thickness (mm) | Roll Weight (t) | Forming Speed (m/min) | Total Power (kw) |
|-----|--------|-----------------|----------------|-----------------|-----------------------|------------------|
| 1   | LW200  | 20×20~50×50     | 1~3            | 5               | 20~80                 | 900              |
| 2   | LW600  | 60×60~150×150   | 2~7            | 10              | 20~60                 | 1400             |
| 3   | LW800  | 80×80~200×200   | 2.5~10         | 15              | 20~40                 | 1600             |
| 4   | LW1050 | 100×100~250×250 | 3~12.7         | 20              | 15~30                 | 2600             |
| 5   | LW1250 | 120×120~300×300 | 3~14           | 30              | 10~25                 | 3200             |
| 6   | LW1400 | 150×150~350×350 | 4~14           | 30              | 8~20                  | 3600             |
| 7   | LW1600 | 200×200~400×400 | 4~16           | 30              | 8~15                  | 3900             |
| 8   | LW2000 | 250×250~500×500 | 4~20           | 40              | 8~15                  | 4200             |
